SOFTWARE ENGINEER

As a recent Software Engineering graduate, I'm excited to fully dedicate myself to building a successful career in the tech industry. I'm passionate, highly motivated, and my education, combined with my love for coding and problem-solving, has equipped me with the skills necessary to excel in this field. I am ready to apply my knowledge and contribute to innovative projects.

PROJECTS

● **eGovernment Portal Integration**
Technologies used : Spring Boot, Angular, Docker, MongoDB, MySQL

Developed three separate applications, each tailored to specific government functions: ePolice for law enforcement, eJudgement for the judicial system, and eProsecution for legal proceedings. Implemented an integration strategy to connect these applications into a cohesive system that promotes data sharing and collaboration among government departments. Utilized modern technologies and programming languages to create user-friendly interface for each application.

● **Social Network**
Technologies used : Spring Boot, Angular, MySQL

Created an application named "Social Network". People can sign in to their profiles. Logged in users can create, update, or delete his community. Within communities, users can create, update, or delete posts. Every logged-in user can react to each post and leave comments. In addition to these basic functionalities, there are many others.

SKILLS

Java, Spring Boot, Angular, MySQL, MongoDB, Docker, Git

EDUCATION

Software and Information Technologies
Faculty of Technical Sciences "Novi Sad"
(2020 - 2024)
Gymnasium "Sava Šumanović" Šid
(2016-2020)

LANGUAGE
Serbian   English

EXPERIENCE

Schneider Engineer Internship (2024)
